FEEDING THE DUCKS

Please avoid feeding the ducks. The feeding of the ducks in the community is causing issues with the feces in the community especially the pools, waterscapes & ponds which in turn causing the pumps to not only clog but also break. The pumps are important for maintaining a clean pond which is vital to avoid odor and to keep the pond water moving so that it is not a breeding ground for not only mosquitos but algae and other spores. Other reasons that feeding of the duck is not good is that bread can be fattening to ducks and make it harder for them to fly and otherwise evade predators, feeding ducks and geese can lead to the following problems as well: Duckling malnutrition - in areas where ducks are regularly fed bread the ducklings will not receive adequate nutrition for proper growth and development. This will also cause ducks to cross busy streets in search of food. We love nature and encourage The Club Series Resident to do their part in keeping our feathered friends healthy.

SOAP IN THE JACUZZI

Hot tubs aren't intended to be used as a bathtub, especially when it comes to soap and suds of any kind. This can cause costly damages and a major foam issue. Please do not add bubble bath, shampoo, detergent or any other soap product.
